SCHEDULE WR-2013
Hwy 99 Distribution System Wheeling Rate

AVAILABILITY

Available for generators in the Hwy 99 Industrial Corridor who wish to use BLEC's distribution system to sell output to a third party. Service is applicable to customers with an output of approximately 1.6 MW and a load factor of 90%. Significantly different output or load factor may require a new tariff be developed.

TYPE OF SERVICE

All wheeling services will be at primary voltage. Transformation will be the responsibility of the generator. Primary discounts are not applicable to this class.

MONTHLY RATE

Wheeling Charge	$ 3.24 Per kilowatt per month of Generator Output

DETERMINATION OF GENERATOR OUTPUT

The generator output shall be the maximum kilowatt output established by the generator for any 30 consecutive minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter and adjusted for power factor.

POWER FACTOR ADJUSTMENT

Generator output charges will be adjusted for consumers to correct for average power factors lower than 97%. Such adjustments will be made by increasing the measured output by the percentage by which the average power factor is less than 97% lagging.

Other Charges That May Apply

BLEC at its discretion may pass on other wholesale costs that apply to wheeling of power.

TERMS OF PAYMENT

The above rates are net. Penalties will be assessed in accordance with established rules and regulations.
